```
7 ## Quarto
```

```
9 Quarto enables you to weave together content and executable code into a finished document.
10 To learn more about Quarto see <https://quarto.org>.
```

↗ plain text

```
12 ## Running Code
```

```
14 When you click the **Render** button a document will be generated that includes both content and the output of embedded code.
15 You can embed code like this:
```

code chunks (cells)

```
16 ▶ Run Cell | Run Next Cell
```

```
17 ```{python}
18 1 + 1
19 ```
```

```
21 You can add options to executable code like this
```

```
22 ▶ Run Cell | Run Above
```

```
23 ```{python}
24 #| echo: false
25 2 * 2
26 ```
```

```
28 The `echo: false` option disables the printing of code (only output is displayed).
```

```
29 |
```

```
` `` {python}  
#| label: howl  
#| echo: false  
(my_generation  
  .select('best_minds')  
  .filter(pl.col('destroyed') == 'by madness'))  
` ``
```

code engine

{python}

#| label: howl

#| echo: false

(my_generation

.select('best_minds')

.filter(pl.col('destroyed') == 'by madness'))

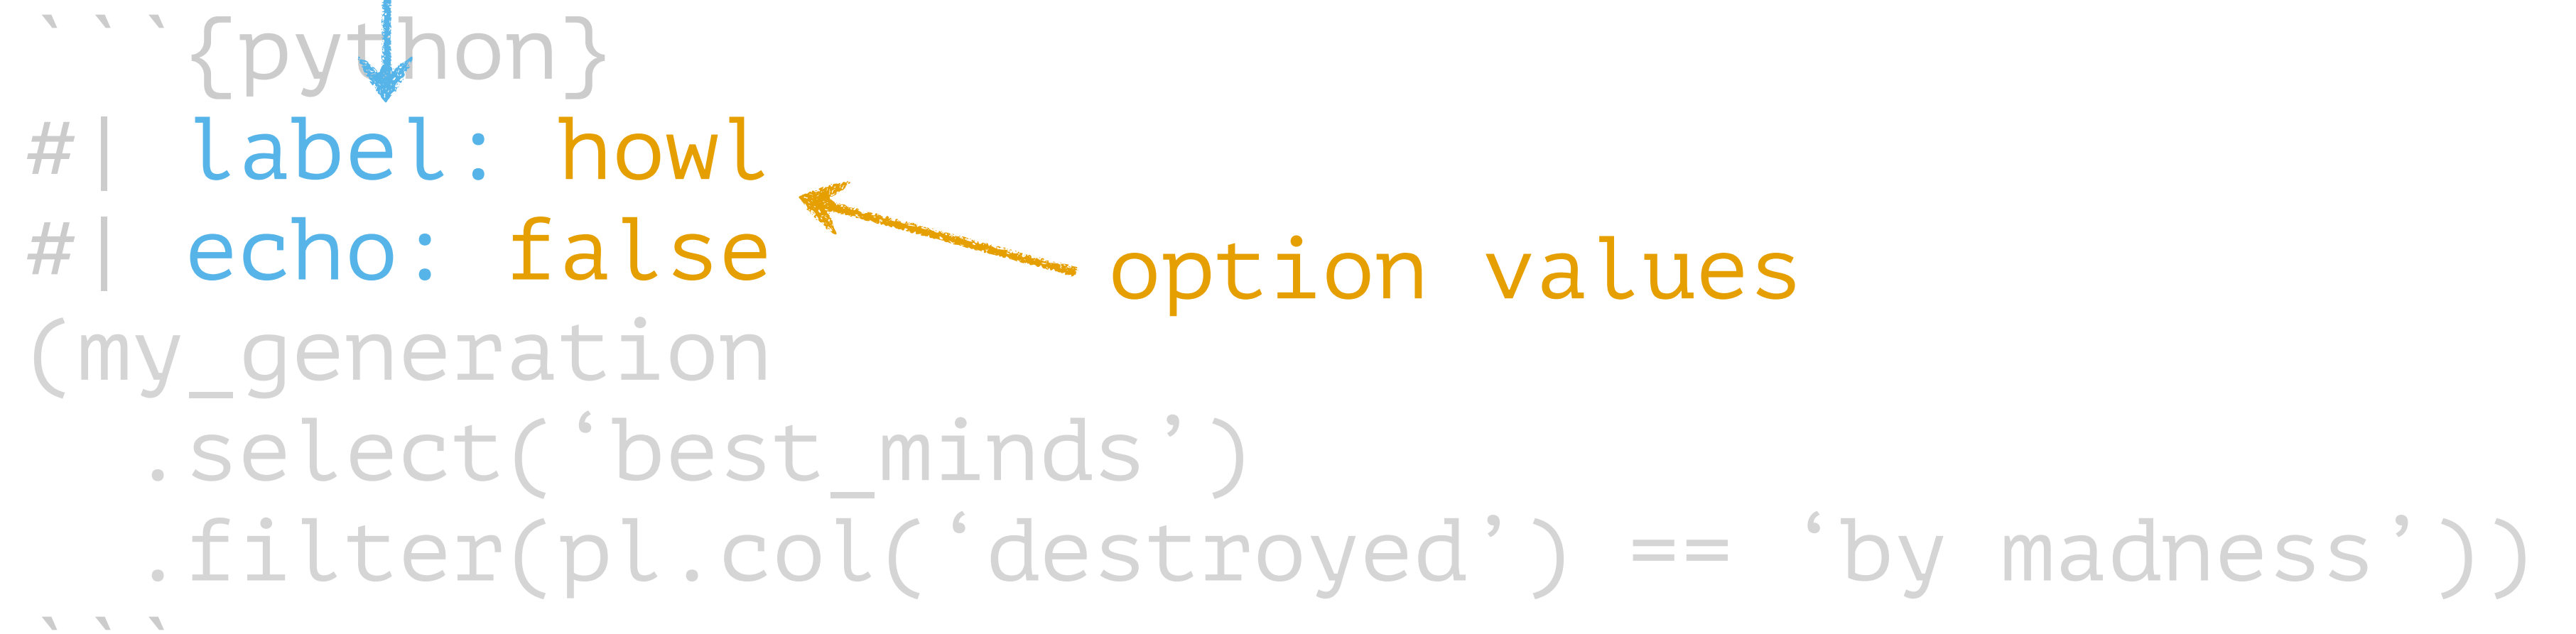

code fences

(three backticks)

chunk options

```
```python  
#| label: howl
#| echo: false
(my_generation
 .select('best_minds')
 .filter(pl.col('destroyed') == 'by madness'))
```
```

option values

code chunk comments

↓
``{python}
#| label: howl
#| echo: false
(my_generation
 .select('best_minds')
 .filter(pl.col('destroyed') == 'by madness'))
``

who wept at the romance of the
streets with their pushcarts full of
onions and bad music,
who sat in boxes breathing in the
darkness under the bridge, and rose
up to build `{python}`
`instruments.select('harpsichord')` in
their lofts,
who coughed on the `{python}`
`len(floors)` floor of Harlem crowned
with flame under the tubercular sky
surrounded by orange crates of
theology,
who scribbled all night rocking and
rolling over lofty incantations which
in the yellow morning were stanzas of
gibberish,
